

Evaluation Summary Report

Working Group: Remotely Sensing Biodiversity Meeting 1

April 21-23 2016

Pamela Bishop
Associate Director for STEM Evaluation

Robin Taylor
Postdoctoral Evaluation Fellow

National Institute for Mathematical and Biological Synthesis
June 2016

This work was conducted at the National Institute for Mathematical and Biological Synthesis, sponsored by the National Science Foundation, the U.S. Department of Homeland Security, and the U.S. Department of Agriculture through NSF Award #EF-0832858, with additional support from The University of Tennessee, Knoxville.

Figure 1. Responses for ‘As a result of participating in this working group, I have a better understanding of...’

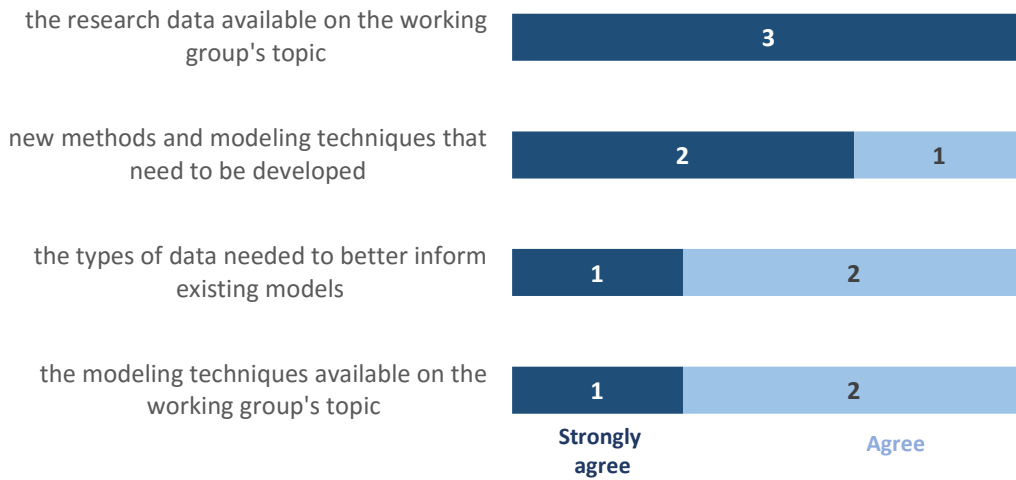

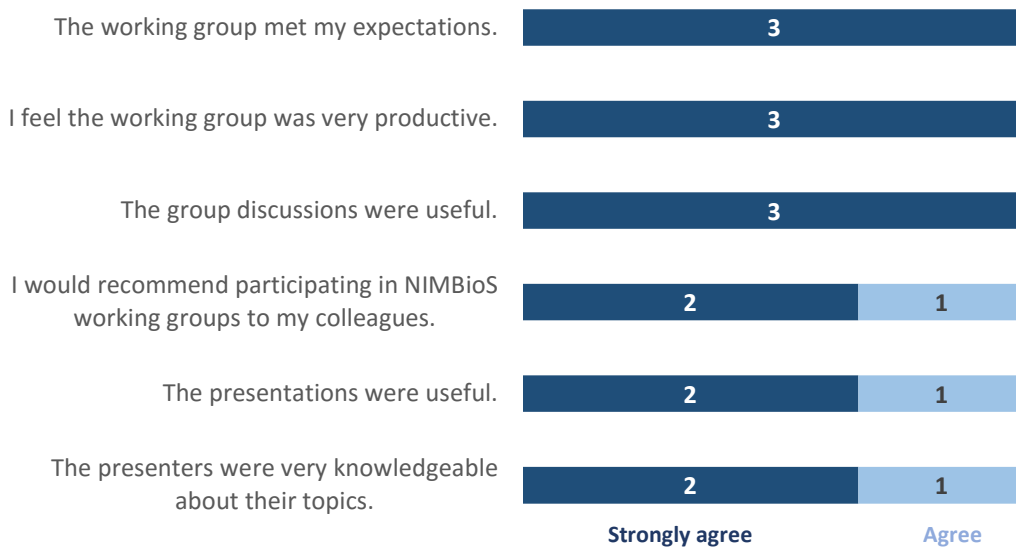

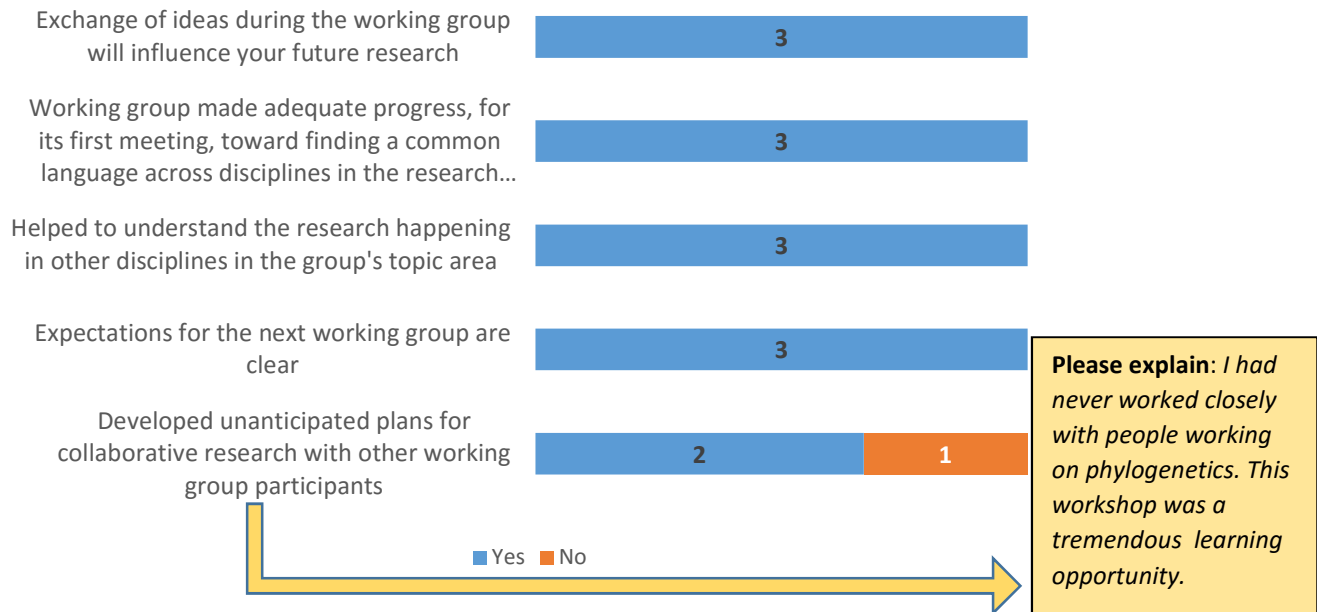

Figure 2. Satisfaction agreement for working group meeting one

3 participants found the working group had an effective format or achieving its goals.

0 participants found it not effective.

Figure 3. Frequencies of yes/no responses to survey questions with open-ended feedback

Open-ended feedback: “What do you feel was the most useful aspect of the working group?”

Discussing ideas/visions with colleagues from different disciplines with enough time and space to go into enough detail for everybody to understand.

That we were able to hash out data and knowledge gaps in this emerging area of research, and also come up with a substantive plan on producing publications that will be of a very integrative nature.

Open-ended feedback: “What if anything would you change about the working group?”

This was a kick-off meeting of sorts. I think we exceeded our expectations given the disparate natures of the disciplines involved. I wouldn't change much at all.

Open-ended feedback: “Additional comments:”

I would like to thank NIMBioS for providing us with a very effective platform for collaboration. I happen to be working on some cross-cutting research ideas and look forward to applying for a grant with NIMBioS too.

We had a great experience and accomplished a lot in a single meeting. Our project is very exciting and the participants are highly engage.
