

Coffee and Pi (Daydream of a Mathematician)

I guess but I don't know and this is helpful at parties and so on

A lot of things are beautiful especially when you're very very very close
A lot of things are beautiful especially when you're backin' way up

A coffee-drinkin machine (they call me) I am a fiend for that bean!
A coffee-drinkin' machine

I see circles
With my circles

It's funny that the pi never stops (why doesn't)
Funny like the shape of a blur
It's funny that the pi never stops (why doesn't)

Pi stop pi stop? Pi stop pi stop?

I guess but I don't know and this is helpful at parties and so on

A lot of things are circular especially when you're vey very very close
A lot of things are circular especially when you're backin' way up

A coffee-drinkin' machine (they call me) hey what's the shape of that
bean?
A coffee-drinkin' machine

I see cones and rodes
With my cones and rods

It's funny that the pi never stops (why doesn't)
Funny like the shape of a blur
It's funny that the pi never stops (why doesn't)

Pi stop pi stop? Pi stop pi stop?

If the pi isn't stoppin' for us maybe we should stop for some pie
