

Risk Assessment Calculator Training

A NIMBioS Tutorial

5-7 March 2019

Knoxville

U.S EPA and RAIS Screening Level Calculator Training for Chemical and Radionuclide Risk Analysis

Hosted by NIMBioS and the Institute for Environmental Modeling (TIEM)

Learn operational knowledge of all TIEM's online risk calculators (cancer risk and hazard index) and delve into the calculator's ability to address site-specific exposures, unique toxicity assessments, and complex risk characterizations. With proper instruction, TIEM's calculators can provide all the tables necessary for exposure, toxicity, characterization, and uncertainty assessment sections of a risk assessment.

Day 3 of training (optional) covers radiation risk assessment.

Continuing Education Units available

Primarily intended for fresh and seasoned environmental professionals working on risk assessment projects at the Federal or State level

Early bird discounts! Register by December 10, 2018
