10:30 Coffee Break
11:00 Wrap up (Group decisions for individual-person-level tasks and timelines)
12:00 Lunch

1. We will begin with each of last meeting's Subgroups presenting where they currently are on their project
2. Group 1 (Abba's group working on the Malaria Model in Kenya) will continue to work as that group; Groups 2 and 3 (Nina's and Rick's groups) will meet "jointly" with anyone from Group 1 who is interested in helping them to focus on the actual writing tasks for papers and proposals coming from their research that would benefit from in-person multidisciplinary expertise.
3. Group Work: the bulk of the meeting will again be dedicated to group work (where the "Writing Group" will work towards writing the various papers/proposals presenting the research efforts of the Working Group and the creation of curated/annotated bibliographies for all of these texts.
4. We will conclude this meeting with discussion of particular tasks from each participant.

Mobility (of participants) between subgroups greatly encouraged.
